General Comments about Lu Wei

Comments
Less discussion time during class is more efficient.
Prof is really good at teaching ML, but I still can't fully grasp ML
Great!
He is very approachable.
Lu wei is very patient and approachable, his understanding is very thorough and he gives his best to try and explain it to us, coming up with many different examples to explain the same concept.
The prof is very knowledgeable about the subject and is very helpful towards all his students
Very clear and addresses student's questions thoroughly.
nil
Prof Lu Wei teaches very well, and he structures his lectures in a very organized way. He spends time to review concepts learnt in the previous class, which is really helpful and engages the class by asking questions frequently. I really enjoy his classes and style of teaching. Prof Lu Wei is very dedicated and patient in explaining concepts to students individually.
The most passionate and kindest professor ever.
Prof is good at explaining with graphs but do not phrase his sentences well. Sometimes the homework and even the exam questions are very vague.
Machine Learning is a challenging course that professor Lu Wei has conducted well. He shows concern for his students by halting the progress of covering content in order to ensure that the learning outcomes of each student does not deviate too greatly from each other. This demonstrates his earnest commitment in ensuring that his students benefit from his class, as opposed to just covering content to a smaller audience.
